Good sources of energy should be dense, always available, easy to transport, easy to store. Intellectually, I have no doubt that nuclear makes the most sense – however, catastrophes such as Fukushima and the Ukraine are still scary.

Sunshine, BlueSkies See how it starts out less than the current energy cost? One bad drought and we would have an inelastic good that cost a fortune and we'd have the double whammy of higher gas prices and higher food prices. Tele-commuting: Change the law to state employers don't have to pay workman's compensation for any employee who works from home more than 36 hours a week. Heat is energy, applications are unlimited. If you can make a lot of money in the present without a thought to the future, history has shown that the cycle repeats itself constantly.
