By asking this one question, you collect simple and timely data that correlate with growth. This has never been more important, as IT teams are asked to balance increasing business demand with static or decreasing budgets.

Nevertheless, accurate and reliable measurement of errors and adverse events can be used retrospectively or prospectively, helpful in screening patients who may be at high risk for adverse events using standardized protocols. I think this is an essential checklist that every company should keep in mind and build upon when it comes to monitoring their impact. Alex Shestopaloff, SegmentSoft Inc. InsideContentMarketing.Lerit, CFA. The Journal Interview Neil E.
